***Allowable Subject Matter***

1. Claims 1-26 are allowed.
2. The following is an examiner's statement of reasons for allowance: Regarding claims 1-26, the prior art of record fails to teach of a route engine to select a block default route pointer or the route pointer as the return route based on the destination address, where the return route pointer determines one of a plurality of output ports for routing the message, the route engine to access the plurality of routing table arrays in the plurality of levels. The closest reference, Varghese et al. (U.S. Patent No. 6,011,795), teaches of a router comprising a plurality of input ports, a plurality of output ports and a forwarding table circuit, but fails to teach of a route engine to select a block default route pointer or the route pointer as the return route based on the destination address, where the return route pointer determines one of a plurality of output ports for routing the message, the route engine to access the plurality of routing table arrays in the plurality of levels. Additionally, Munter et al. (U.S. Patent No. 6,141,738), teaches of a method of creating a forwarding table data structure from a routing table. The routing table contains a number of route entries where each entry contains a prefix representing an address, a prefix length and a resource index, but fails to teach of a route engine to select a block default route pointer or the route pointer as the return route based on the destination address, where the return route pointer determines one of a plurality of output ports for routing the message, the route engine to access the plurality of routing table arrays in the plurality of levels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
